DETAILED ACTION

Response to Amendment

The examiner acknowledges the applicant's submission of the amendment dated 6/24/2008. At this point, claim 2 has been cancelled, claims 14-19 have been added, and claim 1 has been amended. Thus, claims 1, and 3-19 are pending in the instant application.

Response to Arguments

The applicant's argument that Shirashige et al. failed to disclose a solid electrolytic capacitor comprising a porous sintered body of valve metal including a plurality of sintered elements, wherein the sintered elements are aligned in a direction perpendicular to the height direction and to a projecting direction of the internal anode terminal. The examiner finds this argument persuasive, therefore, the examiner made decision to allow this limitation over the prior art of record.

Allowable Subject Matter

Claims 1 and 3-19 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to claims 1, and 3-13, the prior art alone or in combination does not teach the limitation of a solid electrolytic capacitor comprising a porous sintered body of valve metal including a plurality of sintered elements, wherein the internal anode terminal is provided at a position lower than a center of the porous sintered body in a height direction, and wherein the sintered elements are aligned in a direction

perpendicular to the height direction and to a projecting direction of the internal anode terminal.

With respect to claims 14-19, the prior art alone or in combination does not teach the limitation of a solid electrolytic capacitor comprising an internal anode terminal comprises a first anode wire and a second anode wire, wherein the first anode wire and the second anode wire project from the porous sintered body in different directions from each other.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Citation Relevant of Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- a. Matsumoto (US 6,751,086) discloses structure of surface mounting solid electrolytic capacitor.
- b. Maeda (US 6,625,009) discloses solid electrolytic capacitor and method of making the same.
- c. Shiraishi et al. (US 6,392,869) disclose solid electrolytic capacitor.
- d. Yamagami et al. (US 5,629,830) disclose solid state electrolytic capacitor having a concave.
